

Who is Eligible for Home Health Services?

Home Health can often cost less than traditional hospital or nursing care. To be eligible for Home Health, the patient must:

- Be homebound, or unable to leave their home without some degree of difficulty
- Require skilled care
- Have a referral or prescription for home care from their physician

How is Home Health set Up?

If you're interested in setting up Home Health services, simply contact your physician, healthcare provider or your local Adventist Health organization. Scheduling of visits will be determined by your physician and the skilled professionals who will be providing home health services.

Home Care Services

Adventist Health Home Care Service agencies play an important role in our mission to provide compassionate and professional care to our communities. Through Home Health and Hospice programs, patients and their families can receive skilled, personalized healthcare services while residing in the comfort of their own homes. In addition to providing treatment or care management, we strive to improve overall quality of life, hasten recovery and positively influence the emotional, physical and spiritual well-being of our patients.

Adventist Health is dedicated to offering a full continuum of care, including:

- Primary Care
- Specialty Care
- General and Orthopedic Surgical Care
- Acute Care
- Rehabilitation
- Skilled Nursing Facilities
- Home Health
- Hospice

HOME HEALTH

Helping you
with care at
home

Adventist Health 

Home Health Services

There's no place like home especially when you're recovering from a serious illness, recent hospitalization, surgical procedure or a stay in a rehabilitation facility, or if you just need help managing a new or chronic disease.

Recovery at Home

We believe that being surrounded by family and friends helps the healing process, which is why we offer professional medical care in the comfort and convenience of your home. Our goal is to help keep you out of the hospital by using our health care team and your physician to develop a plan of care specialized to fit your medical needs.

Who Covers the Cost of Home Health?

- Medicare
- Medi-Cal
- Workers' Compensation
- Most private insurance companies

Team Based Approach

Home Health is made up of a team of skilled professionals who provide excellent care in your home. From the time a referral is made, our intake staff processes and schedules services based on your health care provider's guidance. Our team of skilled staff includes:

Registered and Vocational Nurses

Provide wound and ostomy care, medication management, tube feedings, pain management, diabetic education and catheter care.

Physical Therapists

Provide rehabilitation at home by providing a home safety evaluation and developing a plan of care to help with gait training, strengthening and improving mobility.

Speech Therapists

Provide comprehensive evaluation and treatment of speech, language, voice, swallowing and cognitive disorders.

Occupational Therapists

Instruct to improve independence with assistive devices, energy conservation, personal care and meal preparation.

Medical Social Services

Provide social services at home including emotional needs and counseling for financial and community resources.

Home Health Aides

Help assist with personal care, bathing and dressing.
